PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of hands-on experience building and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, TypeScript, Docker, and REST API development. Proficient in microservices architecture, JWT authentication, Role-Based Access Control (RBAC), and OpenAI API integration. Awarded 3x Hackathon Winner, 2x National Hackathon Finalist, and 1x International Hackathon Finalist. B.Tech Computer Science & Engineering student (CGPA: 8.0+) seeking a Full Stack Developer, Frontend Developer, Backend Developer, or Software Developer Intern role.

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript, TypeScript, Python, SQL

Frontend Development: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Framer Motion, Axios, Responsive Web Design

Backend Development: Node.js, Express.js, FastAPI, REST API, Microservices Architecture, JWT Authentication, bcrypt

Databases: MongoDB, PostgreSQL, Redis, MySQL, Prisma ORM, Mongoose ODM

DevOps and Tools: Docker, Docker Compose, Git, GitHub, Postman

Concepts: Data Structures and Algorithms, Object-Oriented Programming, RBAC, SDLC, Agile, OpenAI API, LLM Integration

EDUCATION

University of Engineering and Management

Bachelor of Technology in Computer Science and Engineering | GPA: 8.0 / 10.0

Jaipur, Rajasthan, India

August 2024 – May 2028

CBSE Board – Senior Secondary (Class XII)

Physics, Chemistry, Mathematics

India

April 2022 – March 2023

CBSE Board – Secondary (Class X)

General Studies

India

April 2020 – March 2021

WORK HISTORY

Full Stack Developer Intern

University of Engineering and Management

Jaipur, Rajasthan, India

August 2024 – Present

- Developed 3 full-stack web applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL, reducing manual processes by automating key workflows.
- Built and integrated RESTful APIs, implemented JWT-based authentication, and designed scalable database schemas for production-ready applications.
- Applied Docker for containerized deployment, Git and GitHub for version control, and Postman for API testing across all development projects.

ACHIEVEMENTS

3x Internal Hackathon Winner – Won three college hackathons building full-stack and AI-powered solutions against 100+ student teams.

2x National Hackathon Finalist – National-level finalist recognized for full-stack development and AI-integrated applications.

1x International Hackathon Finalist – Competed internationally against global teams with an AI-powered full-stack platform.

PROJECTS

HackFlow AI – Hackathon Management Platform | *Next.js, React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, FastAPI, JWT,*

- Architected a full-stack role-based platform for organizers, judges, and participants with JWT authentication, real-time leaderboards, and automated evaluation workflows.
- Built AI-powered GitHub repository analysis using NLP and GitHub API to auto-generate project summaries, detect tech stacks, and score usability across submissions.
- Developed microservices architecture with Node.js REST API backend and Python FastAPI machine learning service for scalable AI analysis pipelines.

AI Credit Risk and Cashflow Advisor | *React.js, Node.js, Express.js, OpenAI API, Tailwind CSS, Recharts*

2025

- Built an AI-powered credit risk scoring system (0–100) using cashflow and debt-to-income metrics; integrated OpenAI API for explainable financial advisory recommendations.

Rakshak – AI Fraud Detection Platform | *Node.js, Express.js, MongoDB, JWT, OpenAI API, Docker, Redis*

2025

- Developed fraud complaint REST API backend with JWT authentication, RBAC (user, analyst, admin), OpenAI fraud scoring, and Docker containerized deployment.
